

WHAT IT'S FOR

- ✓ It prepares the surface for application of the protector.
- ✓ It removes polishing and lappato residues.

MATERIALS

▶ LAPPATO AND/OR POLISHED PORCELAIN TILES

ADVANTAGES

- Buffered acid, does not release harmful fumes.
- Cleans thoroughly.
- Does not harm metal parts.
- Biodegradable.
- Concentrated product for dilution.

HOW TO USE IT

Dilution. The product can be used diluted.

Application. For cleaning lappato and/or polished porcelain tiles: apply **FILAFT DEK** using a roller, spread evenly over the entire surface with a rotating brush. Rinse with water and blow the surface dry with air. **How much to use.** One litre of product covers about 600 sqm/l depends on the contact time. It is always preferable to carry out in-line testing to check exact coverage. **Operations after installation.** After washing with **FILAFT DEK** the material must be protected with products from the **FILAFT 1239** series.

***Warning:** lengthy contact with concrete floors may cause the product to corrode the surface. We recommend covering adjacent areas with materials like resin, ceramic, etc.*

OPERATORS & SYSTEMS

- Use appropriate PPEs when handling the product.
- Read the MSDS. Rinsing water can be recirculated with the water used for the lappato process.
- Use metal components in AISI 304 steel and seals in Teflon.
- At the end of the day, it is a good idea to wash the application station with water to remove any product residues and keep it clean and efficient.

Composition: Blend of inorganic acids.

Shelf life: 3 years for sealed product stored indoors at a temperature of 20-25°C.

Sizes: 1.000 litre cubes.

Chemical-physical characteristics

- Appearance: liquid
- Odour: typical
- Density: 1,176 kg/l
- pH: 1,2
- storage temperature: 5°C to 30°C
- Application temperature: 5°C to 30°C
- Maximum temperature of the surface to be treated: 40-45°C
- Not flammable (flammability: >60°C)
- Non-corrosive
- Product not classified as hazardous for transport

Safety warnings

Warnings: Danger. Indications of danger: May be corrosive to metals. It causes serious skin burns and serious eye injuries. Caution: Consult a physician if you have the container or the label of the product available. Keep out of reach of children. Only store in the original container. Do not breathe dust / fumes / gases / mist / vapors / aerosols. Wear protective gloves / protective clothing and protect the eyes / face. Immediately contact an ANTIVENI CENTER / a doctor. . . Absorb spill to avoid material damage. Dispose of the product / container in accordance with local / regional / national / international regulations. Contains: PHOSPHORIC ACID.

The information above reflects our latest technical know-how and is the outcome of ongoing laboratory research and testing. However, some factors are beyond our control. It is essential to integrate our suggestions with your own on-site preliminary tests and checks. Fila accepts no liability for improper use of its product.
